lock 1 in the shape and move 3 in the direction of the arrow

② put 1 and 2 together with 2 facing as below

③ making the move

④ chance the direction of 2 until it is facing

⑤ rotate 3 along 1 counter clockwise

⑥ move 3 smoothly while changing the directions of both 2 and 3 respectively

⑦ 3 passes through the trick part of 1. The direction of 3 and the position of 2 have changed

⑧ making the move

⑨ once you have moved 3 to the position in the diagram, move 2

⑩ Keep 1 fixed as in the diagram and move 2 in the direction of the arrow

⑪ making the move

⑫ the passing through stage is complete

⑬ the blocks are lined up in the order 1-3-2

⑭ Make an engagement with blocks 1 and 3 in order to remove 2

⑮ block 2 has been removed

⑯ separate 1 and 3

⑰ separation completed

Tip
With the blocks in the position of step 11, it is possible to combine 2 and 3 as below. If you do this, you can create a combination of 3-1-2, but it is impossible to separate 2 from this formation.
